Ukraine Energy Support Fund OVERVIEW

Ádám Balogh
Head of Ukraine Support Unit
Energy Community Secretariat

SEPTEMBER 2026

Energy
Community
Secretariat

As an International Organisation, managing the contributions of countries to the Ukraine Energy Support Fund, we are a trustworthy partner to suppliers.

War Damage to Ukraine's Energy Sector

Total damage to Ukraine's energy sector ~ **US\$ 24.8 billion***, including:

power sector ~ US\$17.1 billion (70% of all sector damage) of which:

- generation assets ~ US\$14.2 billion;
- energy transmission ~ US\$2.3 billion;
- energy distribution ~ US\$0.7 billion.

War-related losses across the sector ~ US\$88.2 billion.

Total recovery and reconstruction needs ~ US\$90.6 billion
(including US\$70.8 billion for large-scale reconstruction of the power system, district heating systems, gas, and oil infrastructure).

**RDNA5 published February 23, 2026*

UKRAINE ENERGY SUPPORT FUND

Established on the request of the European Commission and in cooperation with the Ministry of Energy of Ukraine.

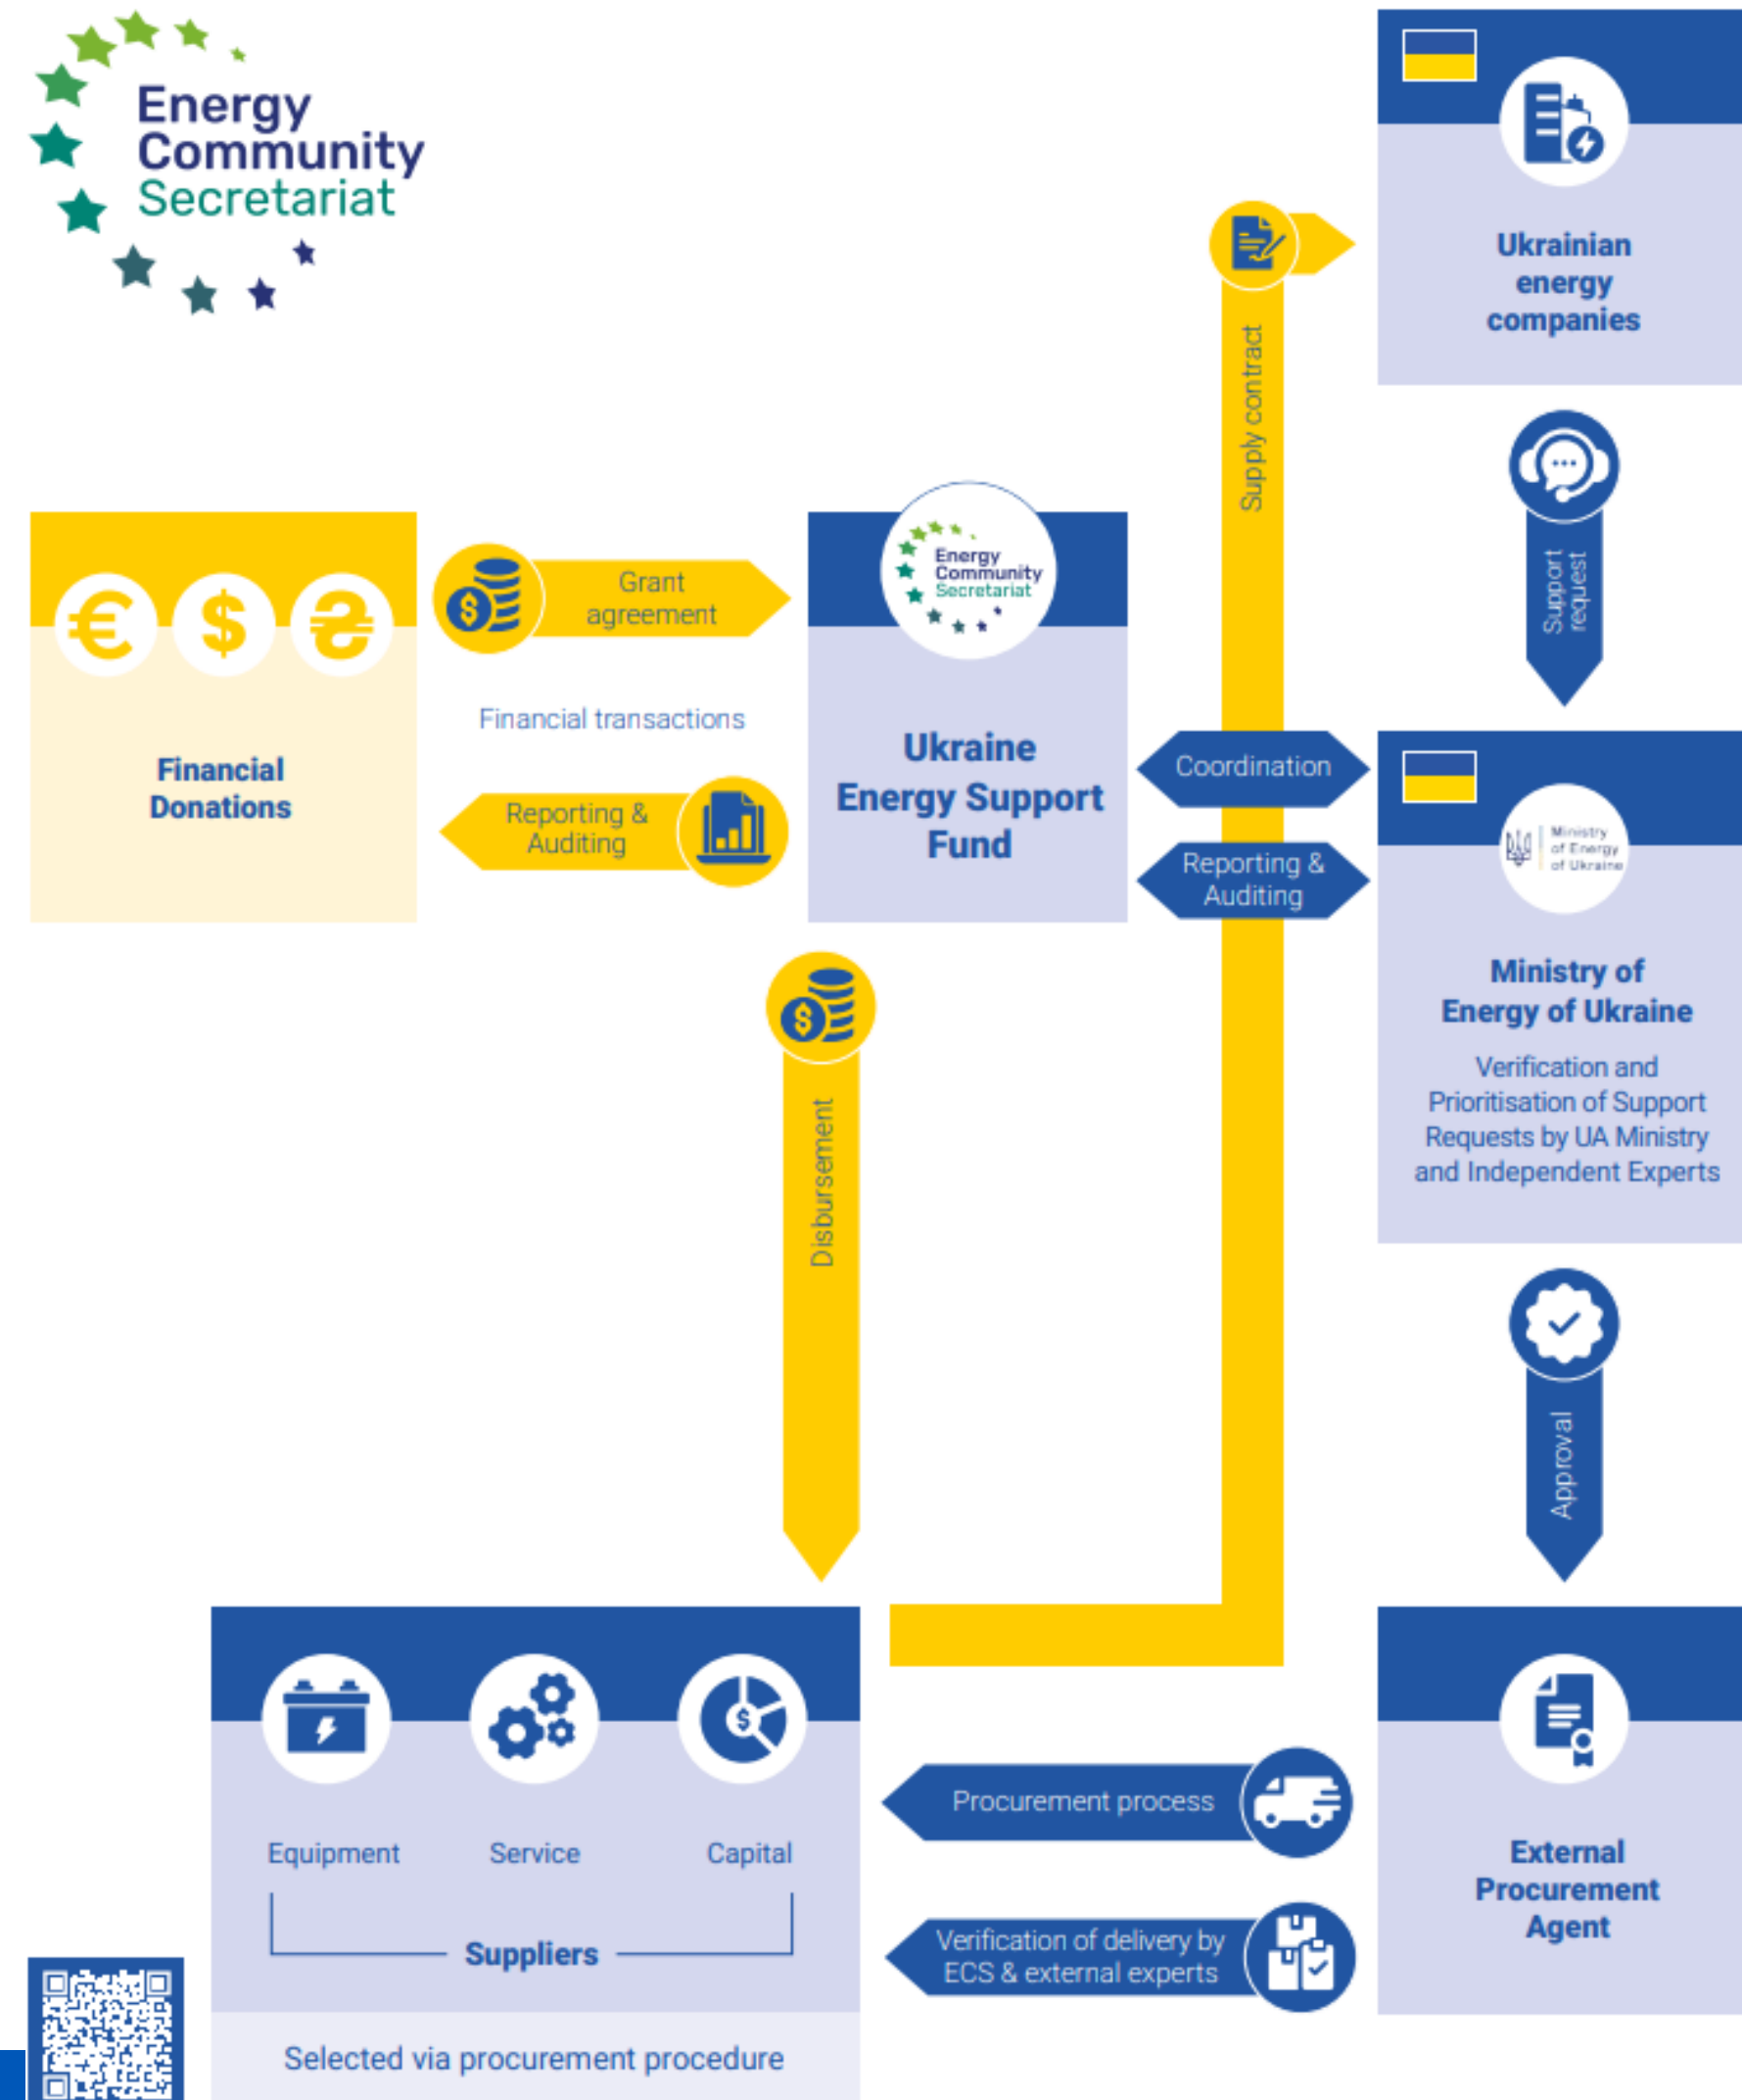

The Fund is a trusted channel for Donors (GOVs, NGOs, Corporate) to support Ukraine's energy sector resilience, address needs.

Support (equipment, services, passive protection, etc.) is supplied to eligible Ukrainian energy infrastructure operating companies. The eligibility list and needs' prioritisation are managed by the Ministry of Energy of Ukraine (dedicated Working Group).

Procurement is handled by an independent procurement agent with sanction and Col screening of bidder / beneficial owner(s).

Operations are transparent, audited, while regular and ad hoc reporting is provided to the Donors, Ministry, the public.

Internal three-level compliance for contract verification and invoice reconciliation.

UKRAINE ENERGY SUPPORT FUND STATUS

Contributions by countries

FUND's SAFEGUARDS and COMPLIANCE

Multi-stakeholder approval of Support Requests

Support Requests of Ukrainian energy companies are reviewed and prioritised by a multi-stakeholder Working Group under the Ministry of Energy of Ukraine.

Independent procurement

All procurements are executed by the independent procurement agent, ensuring transparency and adherence to international procurement best practices via public electronic procurement platform.

No payment risk – a fully pre-funded model

In the moment of allocation of monetary resources for a specific Support Request, the funds are blocked for covering the costs thereof. Hence, funds are secured for each procurement prior to its publication.

Performance security

Above certain limit, a requirement for suppliers is in place to provide an irrevocable and unconditional bank guarantee, securing proper performance of the contracts.

Procedural and legal safeguards

Clear legal and institutional framework separating governance, fund management, and operational responsibilities. Neither the Government of Ukraine nor donors directly manage the Fund's financial resources or procurement procedures.

The Fund is audited annually and ad-hoc. Deliveries and utilisation are tracked, and reported, incl. on site.

Direct payment to suppliers

The Secretariat acts as payer on behalf of Ukrainian companies – the buyers under the supply contracts. Payments are made directly to suppliers upon completion of contractual payment milestones, delivery tracking and invoice reconciliation.

Reporting

A comprehensive reporting framework ensures transparency and accountability in all operations of the Fund: regular reporting to contributors, to the Ministry and the public reporting.

Sanctions screening

Procurement and participation procedures are fully compliant with international sanctions and integrity standards. Bidders shall confirm the country of origin and submit corresponding declaration.

UKRAINE ENERGY SUPPORT FUND

Scale of operation and impact

1.560 supply contracts are concluded

The total value of contracts is over **EUR 1,1 bn**

Over **3.260** payments are made on behalf of Ukrainian companies

The total value of executed payments is over **EUR 850 mn**

73 energy infrastructure operating company received assistance in **23** regions of Ukraine

EUR 790 million worth of equipment reported delivered (over **70%** of contracted)

TSOs, Oblenergos, District heating companies, power generators, RES producers, hospitals, etc.

39 donors, including governments, corporate donors, charity campaign operators

UKRAINE ENERGY SUPPORT FUND STATUS

Electronic Procurement Platform:
<https://uesf.fund;>
<https://www.energy-community.org/Ukraine/Fund/ray/procurement.html>

Built on the dgMarket engine, globally recognized platform (originally developed by the World Bank).

Fully compliant with industry standards ensuring:

- User-friendly interface (ease of use).
- Secure communication and encryption (robust data confidentiality).
- Advanced security protocols (restricted access, automated opening).
- Efficient submission and management of procurement bids.

Bidder's Interfaces:

Registration – process for suppliers to create an account and access the platform

Q&A and Amendments – system for bidders to ask questions and receive updates

Submitting the bids – secure electronic submission of tender documents

Providing clarifications – communication channel with the procurement agent

A Trusted Partner: International Organisation
Trusted by the Donors and UA Ministry of Energy –
Established key international mechanism for
reconstruction
Managing a contract pool of over EUR 1.1 billion
Funds directly available and dedicated for this sole
purpose by the Donors
Payment directly to supplier

Procurements ongoing through the procurement
platform under the administration of
the procurement Agent – UTA-SWECO

Possibility to organize workshops for groups of
businesses interested in exploring procurement
opportunities with the Fund – such as today

Contact with the Procurement Agent via the
Platform

Award criteria: Lead Time and Price

UKRAINE ENERGY SUPPORT FUND STATUS

Key categories of equipment procured under the Fund:

- ❑ **electrical equipment** – including transformers, switchgear, cables, and protection and control systems;
- ❑ **grid** and substation components – including substation equipment, busbars, metal structures, and auxiliary systems;
- ❑ **gas** infrastructure – compressor units, pipes, and valves;
- ❑ power **generation** – including distributed generation solutions, power plant components, CHP units, auxiliary equipment, and control systems;
- ❑ district **heating** and **thermal** equipment – including heat exchangers, boilers, pumps, valves, and control systems;
- ❑ **safety** structures – including passive protection;
- ❑ **specialised tools** – construction and specialty vehicles, special tools and emergency response equipment;
- ❑ directly **associated services** – including installation, commissioning, logistics, and after-sales support;
- ❑ **PV and battery solutions** – panels, inverters, batteries
